### **ACHCU Learning Management System Earns Five-Year Accreditation from IACET**

*HealthTrainU™ Recognized for Excellence in Continuing Education and Training*

**Cary, N.C. (Jan. 6, 2026)** – The Accreditation Commission for Health Care’s learning management system, HealthTrainU™, offered through its educational subsidiary, ACHCU, has earned a new five-year accreditation from the International Accreditors for Continuing Education and Training (IACET). The accreditation period runs from December 1, 2025, through November 30, 2030.

HealthTrainU training and education courses for home health, hospice, and DME organizations met the ANSI/IACET Standard for Continuing Education and Training, an internationally recognized benchmark for structured, measurable and effective learning programs. “We are proud to once again meet the ANSI/IACET Standard and provide healthcare organizations with a trusted, flexible platform for education and compliance,” said Greg Stowell, Associate Director for Education and Training at ACHCU. “As the education arm of an international accrediting body, we value IACET accreditation as a confirmation of quality in ACHCU programs for organizations we serve.”

Fewer than 500 organizations worldwide currently hold this accreditation. As part of the review, the IACET Commission evaluates a provider’s instructional design, learning environment, administrative processes and how continuing education units (CEUs) are awarded and maintained.

“Reaccreditation reflects the dedication of our team and our ongoing focus on delivering current, relevant and effective educational resources,” added Stowell. “HealthTrainU continues to evolve to meet the needs of healthcare organizations for an effective means of delivering and managing staff training requirements. This accreditation reinforces our commitment to delivering high-quality, comprehensive training that supports workforce development and organizational excellence.”

HealthTrainU offers more than 300 courses across 20+ content libraries, giving organizations a centralized, customizable platform for staff training. Users can assign, track and evaluate employee progress, and organizations may upload their own content to support onboarding, competency development and ongoing compliance with accreditation, licensure and regulatory requirements.
