ACHC and MedEdge Solutions Partner to Elevate Pharmacy Performance

CARY, N.C. – Leading accreditor Accreditation Commission for Health Care (ACHC) announced today it is forming a strategic partnership with MedEdge Solutions, a data company built exclusively for the infusion and specialty pharmacy industry.

“At ACHC, we see every day how operational complexity can create unnecessary risk for pharmacy organizations,” said ACHC Program Director Caroline Girardeau. “This new partnership with MedEdge supports pharmacy leaders with greater visibility into their prescriber data, helping them strengthen operational integrity while preparing for accreditation and ongoing survey readiness.”

“This partnership with Accreditation Commission for Health Care reinforces what we believe at MedEdge—that accreditation, compliance, and operational excellence all start with clean, reliable data,” said Brandon Carpenter, Founder and CEO. “By working together, we’re giving pharmacy leaders better visibility into their operations and more confidence in the data they rely on every day.”

Through this collaboration, ACHC-accredited organizations will have access to a no-cost prescriber data assessment from MedEdge Solutions. The assessment evaluates the current state of prescriber records, data quality, licensure details, and potential gaps or risks.

Following the assessment, MedEdge will provide up to eight hours of complimentary prescriber clean-up services. This includes reviewing prescriber tables, identifying inactive or outdated providers, and assisting with corrective updates—ensuring pharmacies have a clean, accurate foundation for ongoing verification and operational confidence.

This collaboration also gives MedEdge Solutions clients special pricing on ACHC Pharmacy Accreditation, including PCAB, Specialty and Infusion Pharmacy. Discounts on select ACHCU educational resources are also available.

About MedEdge Solutions

MedEdge Solutions exists to change how infusion and specialty pharmacies use data. We transform fragmented, hard-to-trust information into a single, reliable source of insight that drives operational efficiency, compliance, and growth. Through purpose-built technology, automation, and advanced analytics across 340B, limited distribution drugs, and PDMP, MedEdge helps pharmacy leaders spend less time validating data and more time acting on it.
