## ACHC Announces Partnership with Pillr Health to Support Pharmacy Optimization

**CARY, N.C.** – Leading accreditor Accreditation Commission for Health Care (ACHC) announced today a new partnership with Pillr Health, a provider of innovative solutions designed to optimize pharmacy operations, particularly in the 340B program.

“Pharmacies need reliable systems, clear data, and knowledgeable support to keep operations running smoothly in a highly regulated environment,” said Caroline Girardeau, PharmD, ACHC Program Director. “Pillr Health understands that reality, and this partnership gives pharmacies another resource to help strengthen performance, support 340B program integrity, and improve access to care.”

“This partnership with ACHC enhances our ability to help clients turn accreditation into long-term operational success,” said Nate Awrich, VP & Managing Director, Pharmacy Acceleration. “Together, we are equipping pharmacies with the tools, guidance, and support needed to meet rigorous standards, improve efficiency, and expand access to high-quality care.”

Through this collaboration, Pillr Health clients receive special discounts on select ACHC Pharmacy Accreditation services and ACHCU educational resources, supporting their efforts to achieve and maintain compliance while advancing operational excellence.

Organizations pursuing ACHC Specialty Pharmacy Accreditation services are also eligible to receive a complimentary Pillr Health 340B Optimization Assessment to identify opportunities where technology and targeted services can enhance operational efficiency, compliance, and overall performance.

### About Pillr Health

Pillr Health is a healthcare technology and services company specializing in pharmacy operations, 340B program management, and compliance-driven data solutions for health centers, hospitals and health systems. Formed through the combination of experienced healthcare and pharmacy organizations, Pillr helps covered entities navigate complex regulations while optimizing entity-owned, retail, and specialty pharmacy models to improve efficiency, expand access to care, and strengthen financial performance.
