ACHC and Vantive Continue Partnership for Renal Dialysis Providers

CARY, N.C. – Leading accreditor Accreditation Commission for Health Care (ACHC) announced today the renewal of its partnership with Vantive, a global vital organ therapy company focused on kidney care and other essential therapies.

“For renal dialysis providers, survey readiness goes beyond simply knowing the requirements. It depends on consistent processes, clear and thorough documentation, and staff who can confidently apply the standards in their daily practice,” said Teresa Hoosier, RN, CDN, ACHC Associate Clinical Director. “This partnership provides eligible Vantive clients with access to ACHC accreditation services and educational resources that support and strengthen that preparation.”

“This collaboration reflects our shared commitment to putting patients at the center of everything we do,” said Guillermo Amezcua, President, Americas, Vantive. “Together with ACHC, we are expanding access to high-quality, reliable care—giving more patients the confidence, support, and connected solutions they need to manage their health with dignity and independence.”

Through this collaboration, Vantive clients receive special discounts on select ACHC Renal Dialysis Accreditation services and ACHCU educational resources, supporting their efforts to achieve and maintain compliance while advancing operational excellence.

About Vantive

Vantive is a vital organ therapy company on a mission to extend lives and expand possibilities for patients and care teams globally. For 70 years, our team has driven meaningful innovations in kidney care. Today, Vantive's people, solutions and services deliver over 1 million touchpoints each day to patients around the world. As we build on our legacy, we are focused on elevating the dialysis experience through digital solutions and advanced services, while looking beyond kidney care and investing in transforming vital organ therapies. Our goal is to provide therapies that fit more easily into providers' practices and patients' lives. Greater flexibility and efficiency in therapy administration for care teams, and longer, fuller lives for patients—that is what Vantive aspires to deliver.
